

Ernestina Cianca is Associate Professor at the Dept. of Electronic Engineering, University of Rome Tor Vergata. She is the Director of the II Level Master on “Engineering and International Space Law in Communication, Navigation and Sensing via satellite”. She is Deputy Director of the Interdepartmental research center CTIF (Center for TeleInFrastructures) at the University of Rome “Tor Vergata”. Her research activities have a strong focus on the space sector, in particular on the optimization and performance analysis of radio interfaces for satellite communications at EHF frequencies, integration of satellite communication and navigation, LEO constellations for PNT services. Recently, she promoted the concept of Space Sustainability by Design, focusing on the ICT technologies that could contribute to the design of future space missions in a way that preserves the long-term usability of space for all. She has been coordinator and scientific responsible of

several ESA and Italian Space Agency (ASI) projects. She is author of more than 160 papers published on international journal and conference proceedings.
