

**Bruno Darboux** is currently working at Airbus, where he holds the position of Director of Aerospace Ecosystem Development in the Group's Corporate Affairs Department, which he joined in 1998. In this role, he oversees actions to ensure that the European and global aerospace ecosystem proactively and collectively engages in the development of new sustainable technologies and decarbonized aviation.

Since September 2021, he has been President of the Aerospace Valley Competitiveness Cluster.

At the same time, Bruno Darboux holds several responsibilities on behalf of the aeronautics and space industry: within CORAC (Council for Civil Aeronautics Research), the European SESAR (Single European Sky ATM Research) program, and IAEG, an international professional association that establishes common practices for the aerospace industry in environmental matters.
