

BENOIT FONCK

SESAR 3 JU - Chief Programme Officer

Graduated from the Belgian Royal Military Academy in 1989, Benoit Fonck held initially different ATC operational and managerial positions within the Belgian Air Force. In 2001, he joined the former Eurocontrol Central Flow Management Unit. He was responsible for defining and implementing the Air Traffic Flow and Capacity Management Strategy together with the development and implementation of enhanced civil-military coordination procedures. He joined the SESAR Joint Undertaking in January 2010 where he is currently Chief Programme. His main responsibilities cover the design of the Digital European Sky Programme and the management of its execution in order to deliver the SESAR Solutions according to the European Master Plan.
